Thymus capitatus from southern Portugal

Ed:
Gabriela Bernardo-Gil
José Abecassis Empis

AIR
AGRO-INDUSTRIAL RESEARCH

European Commission - DG XII - Science, Research and Development

TABLE OF CONTENTS

1. INTRODUCTION

1.1 Applications of *Thymus capitatus*

1.2. Botanical description

1.2.1. Morphological characteristics

1.2.2. Genus *Thymus* (L.)

1.2.3. Classification

1.3. Polymorphism of the genus *Thymus*

1.4. Essential oil of *Thymus capitatus*

1.4.1. Chemical composition

1.4.2. Physic-chemical characteristics of the essential oil of *Thymus capitatus*

1.4.3. Role of the phenolic fraction in the herb's metabolism

2. VEGETABLE MATERIAL STUDIED

2.1. Nature of the studied plant

2.2. Period of harvest

2.3- Drying and storage of the raw material

3. EXTRACTION AND ANALYTICAL METHODOLOGIES

3.1. Extraction of flavour components

3.1.1. Hydrodistillation

3.1.1.1 Steam distillation

3.1.1.2. Material introduced in water

3.1.1.3. Work conditions

3.1.2. Extraction with organic solvents

3.1.2.1 Work conditions

3.1.3. Extraction with dense CO₂

3.1.3.1. Extraction apparatus

3.1.3.2. Work conditions

3.2 Extraction of antioxidants

3.2.1. Methods of extraction

3.2.2. Work conditions

3.3. Chemical analysis of the different extracts obtained

3.4. Antioxidant activity evaluation

4. RESULTS

4.1 Aromatic compounds

4.1.1. Extraction Yield

4.1.1.1. Classical methods

4.1.1.2. Dense CO₂ extraction

4.1.2. Chemical composition

4.2. Antioxidants

4.2.1. Extraction yield

4.2.2. Evaluation of antioxidant activity (AOA)

5. SUPERCRITICAL DATA EXTRACTION MODELLING

5.1. Introduction

5.2. Extraction Models

5.2.1. Single Sphere Model I

5.2.2. Single Sphere Model II

5.2.3 Characteristic time model

5.3. Data Modelling Results and Discussion

6. APPLICATIONS

6.1. Acceptability of *thymus capitatus* flavour

6.2. Determination of the detection threshold

6.3. Acceptability of thyme flavour

7. CONCLUSIONS

REFERENCES
