

LIV VENT

**LOW -
FUNCTIONALITY
PROTOTYPE**

Group 1 - 100 Limites

Streaming app that allows people to watch music events live online.

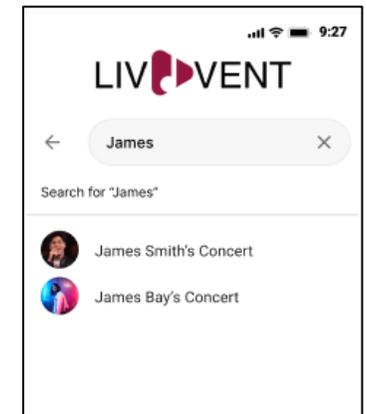

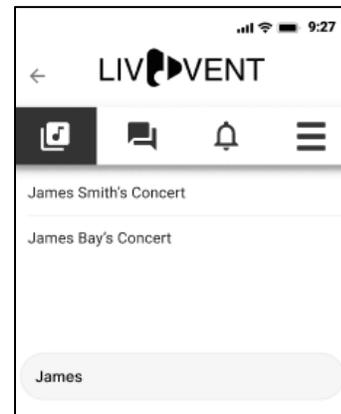

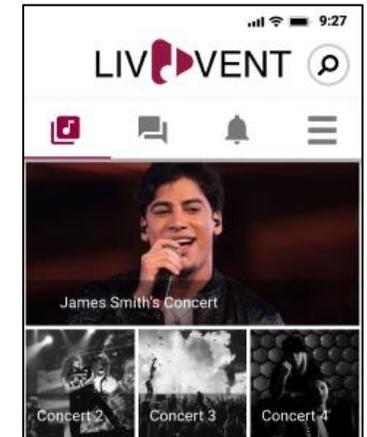

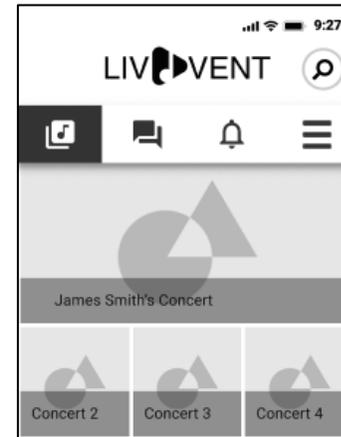

THIS WEEK

- ❖ Added color and images to the low-fi prototype
- ❖ Changed elements according to user tests
- ❖ Added some new screens
- ❖ Cleaned and changed a few screens' UI and structure
- ❖ Fixed some inconsistencies.

CRITICAL TASKS

Streaming

Communication

Notification

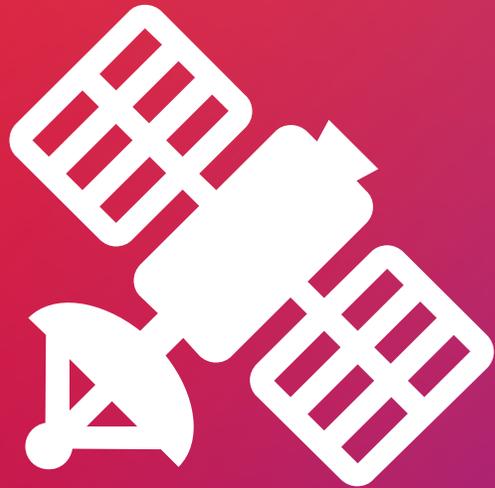

FEEDBACK INCORPORATION

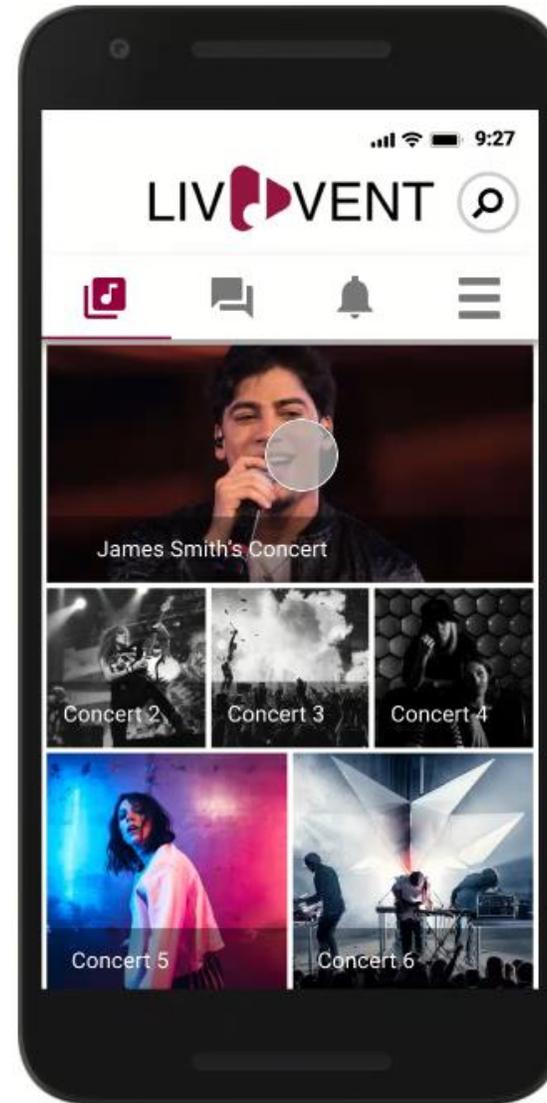

Persona	Problem	Solution
Fan	Receiving confirmation after following an artist	Change the button's text to "unfollow" when clicked
Fan	Understanding how to go to a voice call	Fan receives a notification when voice call starts that leads to it
Artist	Receiving confirmation after starting a concert	Transition to the live stream
Artist	Cannot specify date and time of the concert	Added new input fields for date and time
Artist	Couldn't complete the profile information right after creating an account	New screen on sign up operation to complete the profile

NEXT STEPS

- ❖ Become more familiarized with flutter.
- ❖ Perform some minor adjustments to the low-fi prototype if needed.
- ❖ Start development of the high-fidelity prototype.
